  * Developed a GUI-based shopping application with minimalistic user interface that has the features like sign-in, sign up, view product, add to cart, categories of products, etc
  * All the operations and features are saved and work on python, tkinter, mysql database.

Projects

Hotstar Clone - Landing Page, July 2022
- Developed a clone of landing page of Hotstar web-application to improvise my frontend skills.
- This project involves skills like HTML, CSS, Javascript, Bootstrap.

Matdaan - Online Voting System, Jan 2023 - June 2023
- Developed a team project of voting system which allows users to create their account and do voting from their place without facing any issues.
- Features like person can vote one time and can create one account only, candidate list for current voting is shown.
- Admin can manage the candidate and verify whether user is valid or not and also publish the results for users after election ends.
- This project involves skills like Reactjs, Nodejs, MongoDb, CSS.

Portfolio website, June 2023
- I created my portfolio website which contains information about me, my work, etc.
- This project involves skills like HTML, CSS, Javascript, Bootstrap.
